OPTIMAX ERP WEB UI

UI Transition Mockup

A calmer, implementation-oriented redesign aligned to the current OptimaX ERP shell: sidebar navigation, tab-driven modules, forms, filters, and tables.

MODERN ERP SHELL

OptimaX ERP, redesigned as a real product interface.

This mockup keeps the familiar OptimaX navigation logic and module structure, but upgrades the visual system: lighter hierarchy, stronger spacing, better tables, calmer typography, improved tab patterns, and more credible operational workspaces. Each module below is clickable and reveals realistic UI components rather than poster-style concept tiles.

DASHBOARD

Executive and Operations Dashboard

A cleaner home surface that behaves like the current ERP entry point but with better metric hierarchy, a more usable approval queue, and cross-module action tiles that do not overpower the screen.

Role: Executive | Switch View

Cash Position

Available treasury and operational liquidity.

₦248.6M

Resolve stock transfer	Assigned
Check daily POS summaries	Ready

HR AND PAYROLL

People Records, Attendance, Leave, Payroll

This mirrors the current HR-heavy ERP usage: record forms, operational tabs, and payroll readiness views are all first-class instead of hidden behind generic tiles.
